

# Take Advantage of Food Service Savings Today

## Eligibility

You must be a non-residential customer with facilities located in Appalachian Power's service territory. Customers served under the Public Authority and Commonwealth of Virginia tariffs, or customers who were opted out of Appalachian Power's energy efficiency programs as of July 1, 2018, may not be eligible. Please call or email to confirm eligibility.

## Participation is simple

- 1 Utilize our application portal or download the application at [TakeChargeVA.com/business](http://TakeChargeVA.com/business).
- 2 All projects require pre-approval from program staff prior to installation. After pre-approval installation may begin.

Within 90 days of project approval, the applicant must complete the project or request and receive another 90-day waiver. After installation is complete, submit a completed application form with product specifications, dated invoices and installation date(s) to:

### Email

[takecharge-business@cleareresult.com](mailto:takecharge-business@cleareresult.com)

### Mail

Take Charge Business Program  
3100 West Road, Building 3, Suite 200  
East Lansing, MI 48823

- 3 After the project is complete, an incentive check will be sent to the facility owner's specified recipient.

## Serve up savings with restaurant upgrades

## TAKE CHARGE<sup>SM</sup>

[TakeChargeVA.com/business](http://TakeChargeVA.com/business)

## Score more savings for your kitchen

Commercial kitchens are high-volume energy users, consuming as much as three times more energy per square foot than most areas of commercial buildings, according to Business Energy Advisor. Because energy costs can be high, upgrading to energy-efficient equipment and taking advantage of cash rebates can boost your bottom line.

### We offer rebates for fridge and freezer upgrades.

Appalachian Power's Commercial and Industrial Energy Efficiency Program is giving plenty of cash back for upgrades to run your refrigerators and freezers more economically. That means more savings — now and for months to come.

### Example project

This hypothetical example illustrates an upgrade scenario that could take place in a restaurant or commercial facility like yours:

Replace four solid freezer and two glass refrigerator doors; add a pre-rinse sprayer on the sink near the dishwasher; and replace the 500-can vending machine in the dining area with an ENERGY STAR® model.

**21,177** Estimated kilowatt-hour savings per year

**\$2,013** Approximate energy cost savings per year (based on a \$0.10/kWh rate)

**\$461** Rebate savings

### Cash rebates for available equipment

Check out the list below of equipment upgrades and the many rebates available when you make the switch.

EQUIPMENT TYPE	REBATE AMOUNT
Anti-Sweat Heater Controls Installed on Cooler Case	\$181/door controlled
Anti-Sweat Heater Controls Installed on Freezer Case	\$217/door controlled
Auto-Closer for Walk-In Freezer Door	\$78/unit
Freezer ECM	\$17 to \$31/unit
ENERGY STAR Commercial Freezer - Glass Door	\$34 to \$102/unit
ENERGY STAR Commercial Refrigerator - Glass Door	\$29 to \$50/unit
ENERGY STAR Commercial Freezer - Solid Door	\$41 to \$48/unit
Low Flow Pre-Rinse Sprayer Full Service Restaurant (Electric HW)	\$50/unit
ENERGY STAR Refrigerated Vending Machine	\$88 to \$140/unit

Note: Savings will vary based on facility type and hours. Consult a program engineer for information.
