

Switch to LEDs

One of the easiest ways to save energy at home is by installing more energy efficient light bulbs like light emitting diode (LED) bulbs.

Installing LED Bulbs Can Help You Save

LEDs use up to **75% less energy** than traditional light bulbs, and last more than 15 times longer. This simple upgrade is a great way to save money each month.

Install your kit's **LED light bulbs** and **safety nightlights** in your home today. Over time, changing to LED bulbs can add up to major savings.

Lighting can account for up to **20% of the average home's electric usage**. Don't miss out on easy savings!
